November 2014’s monthly index of economic activity, IMACEC.

According to preliminary information, in November 2014 the IMACEC grew 1.3% over the same month a year before. The seasonally-adjusted series rose 0.2% with respect to the previous month, and 1.6% in twelve months. The month came with the same number of working days as November 2013.

The result reflected mainly the higher value added from services, which was partly offset by the drop in mining, manufacturing, and retail trade activity.
