Imacec June 2007

June 2007's monthly index of economic activity, Imacec

According to preliminary information, last June the Imacec increased by 6.1% with respect to the same month last year. The seasonally-adjusted series showed no change over the previous month, while the cyclical trend series recorded an annualized expansion of 6.0%. The month came with one more working day than June 2006. The result reflected the negative effect of the drop in the value added of electric generation.
