REQUEST FOR INFORMATION (RFI)

OUTRIGHT OPEN MARKET OPERATIONS SYSTEM

As a result of the evaluation of the pre-proposals received in the process of Request for Information for Outright Open Market Operations System, the Central Bank of Chile has decided that the following companies' pre-proposals are the ones that better meet with the requirements defined for the implementation of an Outright Open Market Operations System in this Institution:

- CMA Small Systems
- LOGICA
- MONTRAN

The Central Bank of Chile thanks the companies' valuable participation at this stage of Request of Information, designed to advance in the project of Modernization of Open Market Operations.

As a result of the aforementioned, the Bank will opportunely resolve, in its sole judgment, the beginning of a process of RFP for the supply, implementation and the functional and technical maintenance of a Open Market Operations System, that will contain the requirements of experience for the offering companies, and requirements for products, based on the information picked up in this process.

In the future it may be necessary to request further information from the pre-selected companies.
