Peñaflor			

GENERAL BACKGROUND

LOCATION AND AREA :

Chile is located in the southwest of South America stretching as far south in the Antarctica as to the South Pole itself and with its westernmost province, Easter Island, in the South Pacific Ocean.

On the American continent, Chile stretches from 17°30' S at the northern boundary to 56°32' S at the southernmost tip of South America.

The Chilean Antarctic Territory comprises the whole of the area located south of the 60° S, between meridians 53° and 90° W as far as the South Pole at 90° S.

The national territory comprises several islands in the Pacific Ocean, which add to the country's territorial waters. The nearest to the continent are the islands that form the Juan Fernández archipelago, and San Félix and San Ambrosio islands. The most distant from the mainland are Salas y Gómez and Easter Island or Rapa Nui.

The latter is located at 27° S and 109°30' W, opposite the port of Caldera and 3,760 kilometers away from the mainland.

From the Concordia line to the South Pole, the country is over 8,000 kilometers long. The area of South American, Antarctic and Oceanic Chile is 2,006,096 sq.km, with 756,096 sq.km corresponding to South American and insular Chile and 1,250,000 sq.km to the Chilean Antarctic Territory.

SOUTH AMERICAN AND INSULAR CHILE	sq. km	Share (%)
Total	756,096	100.0
Cropland	21,204	2.8
Grazing land	145,000	19.2
Forest land	117,124	15.5
Non-productive land	472,768	62.5
CHILEAN ANTARTIC TERRITORY	1,250,000	
TOTAL	2,006,096	

Source: Seventh National Agriculture and Forestry Census (*VII Censo Nacional Agropecuario -2007*).

**BOUNDARIES:**

Chile is bounded on the north by Peru, by a border line known as *Línea de la Concordia*; on the east by Bolivia and Argentina, mainly by a line that runs through the highest summits of the Andes; on the south by the South Pole, and on the west by the Pacific Ocean, including 200 nautical miles of territorial waters.

CLIMATE AND NATURAL RESOURCES:**The North**

Climate: Warm desert.

Natural resources: Nitrate, copper, iron, lithium and other minerals, valleys suited for agriculture, and sea foods.

The Center

Climate: Mild and temperate, with rains in winter.

Natural resources: Agricultural lands especially suitable for fruitgrowing, wine-growing, grazing lands, forests, hydroelectric power (rivers), copper and sea foods.

The South

Climate: Temperate and rainy.

Natural resources: Agricultural and grazing lands, forests, hydroelectric power (rivers) and sea foods.

The Far South

Climate: Cold steppe.

Natural resources: Forests, petroleum, natural gas, coal, limestone, sheep, and sea foods.

POPULATION

GENERAL BACKGROUND:

According to past censuses, in 1835, Chile had a population of 1,103,036; in 1895, 2,695,625; in 1907, 3,231,022; in 1940, 5,023,539; in 1960, 7,374,115; in 1970, 8,884,768; in 1982, 11,329,736; in 1992 13,348,401; and the latest 2002 population census registered 15,116,435 inhabitants which for 2017 was estimated at 18,373,917 inhabitants.

This steady growth of the population is mainly due to moderately high birth rates (until 1961, the birth rate was 34 in a thousand, on average) and to a decreasing mortality rate, from 25 to 12 deaths in a thousand between 1933 and 1961.

Around 1961 the birth rate began to decrease to 13.6 births in a thousand in 2015, while mortality was 5.7 deaths in a thousand in 2015. This produced a gradual decrease of natural growth, as well as on the rythm of the total population average growth.

In turn, these changes are due to modifications experienced by two components of the Chilean population, fertility and mortality—the other is migration—from high to low levels⁽¹⁾; this process, known as demographic transition, impacts the population pyramid, and since it began in 1961, today it presents an advanced phase of elderly population.

An elderly population is characterized by low birth and death rates. In terms of age it means a lower proportion of people aged under 15 years and a relative increase of people of 60 or

(1) In 1961 each woman at the end of her fertile period contributed with 5.4 children as an average, whereas in 2010 she contributes only with 1.9 child. A newborn in 1960 had a life expectancy of 58.1 years whereas in 2017, he is expected to live 79.4 years.

more years. As a matter of fact ⁽²⁾, in Chile, in 1960, there were 19 individuals of 60 years or older in one hundred children, aged 15 or less. In 2011 this figure was estimated at 60.

Until 1930, the population was predominantly rural: in 1875, 65.1% and in 1920, 53.6%. The 1940 census reversed the situation and nowadays, according to the census of 2002, only 13.4% of the population is rural and only 12.6% in 2017.

On 30 June 2015 Chile has a population density of 9.0 inhabitants per square kilometer and the Metropolitan Region of Santiago, home to 40.6% of the national total, has a density of 474.8 inhabitants per square kilometer.

SYSTEM OF GOVERNMENT, AND POLITICAL AND ADMINISTRATIVE ORGANIZATION

According to the Political Constitution of 1980, Chile is a unitarian state. For interior administration and government, the country is divided into regions and these into provinces. For local administration, the provinces are divided into communes.

Regional government is the responsibility of the Intendent, who is the immediate representative of the President of the Republic and is answerable directly to him.

At the head of the regional administration is the Regional Government with full legal capacity and its own assets. It consists of the Intendent, its maximum authority, and the Regional Council which has normative, resolving and supervisory capacities.

Provincial government corresponds to the Governor, also answerable directly to the President of the Republic and subordinate to the Intendent. He administers in representation of the Intendent and is assisted by a consultative Provincial Social and Economic Council of which he is the Chairman and he may also constitute a Technical Advisory Committee.

Local communal administration is carried out by the Municipality, an autonomous public body with full legal capacity and its own assets. It consists of the Mayor and his Council with normative, resolute and supervisory capacities. At the same time, each commune has a Communal Social and Economic Council, chaired by the Mayor, which has consultative duties. The Mayor is the chairman of the Council and, is elected by public vote. The councillors are proportionally elected by public vote.

Most of the Ministries and National Public Services are decentralized territorially by way of Ministerial Regional Secretariats and Regional or Provincial Directions respectively, the latter being subordinated to the Ministerial Regional Secretary and both subordinate to the Intendent.

Furthermore, in each region there is a Regional Cabinet to assist the Intendent integrated by Governors, Ministerial Regional Secretaries and by regional heads of state administration nominated by the Intendent.

THE REGIONS AND THEIR CAPITALS:

Decree Law 575 (10 July, 1974), divided the Chilean territory into thirteen regions. Later on, Law 20174 published on the *Official Gazette* of 5 April 2007 established Region XIV and Law 20175 published on the *Official Gazette* of 11 April 2007 established Region XV, becoming a total of fifteen regions.

(1) The contributions to GDP growth are calculated from the series at previous year prices compiled under the chained index method. By definition, these contributions are additive and allow an appropriate year to year economic analysis.

(2) For further details about the calculation method of the contributions, visit www.bcentral.cl/estudios/estudios-economicos-estadisticos/100.htm

(3) 2016 provisional figures and 2017 preliminary figures.

(4) Includes education, health care, and other services.

	2013	2014	2015	2016	2017
Gross national disposable income, chained volume at previous year prices (1)(2)(3) (millions of chained-pesos)					
Gross Domestic Product	137,876	140,312	143,547	145,364	147,530
Factor income receipts from the rest of the world	4,134	4,780	4,532	4,514	4,864
Factor income payments to the rest of the world	10,109	9,640	8,693	8,613	10,762
Gross national product	131,901	135,453	139,390	141,271	141,634

Current transfers receipts from rest of the world	2,087	2,179	2,212	1,959	2,157
Current transfers payments to the rest of the world	924	980	1,061	1,083	1,116
Gross national disposable income	133,065	136,652	140,541	142,142	142,671
Interannual variation		2.7	2.8	1.1	0.4
Real gross national disposable income	133,065	135,626	138,211	141,418	145,340
Interannual variation		1.9	1.9	2.3	2.8
Domestic demand	138,668	138,015	141,523	143,429	147,835
Interannual variation		-0.5	2.5	1.3	3.1

(1) Chained series lose the additivity property of fixed based series; therefore the aggregates differ from the sum of their components.

(2) The chained volume effect of the terms of trade is not calculated because it takes zero values in the reference year of mobile bases.

(3) Preliminary figures.

(1) This index measures delivery evolution to construction, manufacturing, wholesale, and hardware companies. The sample includes, cement, round iron bars, fiber-cement products, copper pipelines, bricks, insulators, glass, PVC pipes, and gypsum cardboards.

(2) Includes direct imports carried out by domestic producers.

(3) Monthly averages of each year. Index measures net invoicing of construction works performed by a sample of 32 building firms members of the General Contractors Committee of the Chilean Chamber of Builders.

(4) Monthly averages for each year. The Imacón series is seasocially and calendar adjusted.

(5) Monthly averages for each year. Index measured on the basis of updated unit costs of a 73 DFL-2 one-story, 69.8 square meters dwellings group, built up in Santiago.

(6) The Real housing price index (IRPV) is a set of price indices of new house in Greater Santiago, computed by the Chilean Chamber of Builders (*Cámara Chilena de la Construcción*) based on a hedonic prices methodology mostly used in developed countries. They are actual indices since they are estimated on house sale prices expressed in UF (IPC indexed unit).

(7) The Months item is computed from the stock divided by the number of dwellings sold. Figures are monthly averages for each year. This indicator is intended to show the time until the stock will be sold out.

(8) Data gathered by the National Statistics Institute (*Instituto Nacional de Estadísticas*, INE) through the approved construction permits, with increased built up area, extended by the corresponding Municipal Works Office all over the country. New work means any new independent structure built up on a new area.

Drinkable water delivery	-	100.0	101.3	103.4	104.7
Annual change (%)	-	-	1.3	2.1	1.2

(1) Includes 93, 95 and 97 octane gasoline.

(2) Includes public service generators and self generators; iron and steel industry and regular gas plants; coal consumption, and methanol production plants.

(3) This index summarizes electric power consumption measured in megawatts, pipeline gases in cubic meters, and drinkable water for general public in cubic meters. Measure is done through delivery carried out by agents responsible of these activities to intermediate and final consumers.

(*) As of April 2010, the New National Employment Survey (*Nueva Encuesta Nacional de Empleo, NENE*) replaced the former National Employment Survey (*Encuesta Nacional de Empleo, ENE*) operative since 1966. This new measure is based on concepts and criteria on line with international standards and with the best methodological and working practices of the OECD member countries. From the statistics standpoint this modernization includes the recommendations of International Meetings on Labor Statistics of the ILO. The innovations encompass conceptual changes on employment conditions classification (employed, unemployed, and passive); changes in the measurement through design of a new questionnaire; incorporation of new subjects for analyses and indicators; and the updating of the classification nomenclature in use. Hourly labor cost index (base 2009=100)					
Nominal					
December of each year				103.31	107.65
Annual change (%)				-	4.2
Real (3)					
December of each year				90.71	92.43
Annual change (%)				-	1.9
Monthly minimum wage at December of each year (Ch pesos each year) (4)					
Workers between 18 and 65 years of age	210,000	225,000	241,000	257,500	264,000
Workers under 18 years of age and over 65 years of age	156,770	167,968	179,912	192,230	197,082

(1) The accumulated twelve months, variations are referential nature since it is calculated on 2013 = 100. The remuneration refers only to payments received by ordinary time, ie, it excludes any sporadic payment. The concept of cost of labor remuneration corresponds to the employer's costs for employee expenses returns. For example, collation, mobilization, training and welfare services, among others.

(2) Figures deflated by the consumer price index (CPI Base 2013 = 100).

(3) Figures deflated by the Central Bank using the consumer price index (CPI). Due to the change in CPI base year, the INE Real IR recalculated previous months to January 2014 the CPI Fayed, that begins as of January 2010. variations deflated series are maintained with the CPI base 2009 = 100.

(4) Corresponds to the minimum taxable amount can pay a worker for the provision of their services. The word refers to that taxable minimum amount is intended to finance employee pension schemes.

(1) Corresponds to the estimates and projections of population, country and region from 2002 to 2020.

(2) Figures for births and registered in the reference year more late registration.

(3) For the calculation of rates until 2011 it estimated to June 30 of each year population was used, considering the Population Estimates and Projections based on the 2002 census (published historical figures are kept). For the year 2012 onwards the rates were calculated by updating the population estimates and projections, country and regions 2002- 2020.

(4) Corresponds to the deaths of children under one year.

(5) Corresponds to the deaths of under 28 days.

(6) Relates to stillbirths or fetal deaths.

(7) Figures from the Statistical Bulletin of the National Health Fund (Fonasa). From 2010 the data reported concerning insured population in Fonasa, which corresponds to a statistical estimate.

(8) Source: National Health Fund (Fonasa).

(9) Figures for the population projection of the INE carried December each year.

(10) Includes all beneficiaries of public health insurance administered by the National Health Fund (Fonasa).

(11) Includes all beneficiaries of private health insurance system administered by the health insurance institutions (Isapres).

(12) Armed Forces consider individuals and uninsured people in the public and private insurance.

(13) Quarters average of each year, of the results of the National Employment Survey INE quarters. For the classification by educational level, it has been used International Standard Classification of Education (ISCED) designed by Unesco in 1970.
