MAP OF CHILE BY REGIONS

GENERAL BACKGROUND (A)

LOCATION AND AREA:

Chile is located in the southwest of South America stretching as far south in the Antarctica as to the South Pole itself and with its westernmost province, Easter Island, in the South Pacific Ocean.

On the American continent, Chile stretches from 17°30' S at the northern boundary to 56°32' S at the southernmost tip of South America.

The Chilean Antarctic Territory comprises the whole of the area located south of the 60° S, between meridians 53° and 90° W as far as the South Pole at 90° S.

The national territory comprises several islands in the Pacific Ocean, which add to the country's territorial waters. The nearest to the continent are the islands that form the Juan Fernández archipelago, and San Félix and San Ambrosio islands. The most distant from the mainland are Salas y Gómez and Easter Island or Rapa Nui.

The latter is located at 27° S and 109°30' W, opposite the port of Caldera and 3,760 kilometers away from the mainland.

From the Concordia line to the South Pole, the country is over 8,000 kilometers long. The area of South American, Antarctic and Oceanic Chile is 2,006,096 sq km, with 756,096 sq km corresponding to South American and insular Chile and 1,250,000 sq km to the Chilean Antarctic Territory.

SOUTH AMERICAN AND INSULAR CHILE	756,096 sq km
Cropland	16,560 sq km
Grazing land	129,300 sq km
Forest land	84,200 sq km
Non-productive land	526,036 sq km
CHILEAN ANTARCTIC TERRITORY	1,250,000 sq km
TOTAL	2,006,096 sq km

BOUNDARIES

Chile is bounded on the north by Peru, by a border line known as Línea de la Concordia; on the east by Bolivia and Argentina, mainly by a line that runs through the highest summits of the Andes; on the south by the South Pole, and on the west by the Pacific Ocean, including 200 nautical miles of territorial waters.

CLIMATE AND NATURAL RESOURCES :

The North:

Climate: Warm desert.

Natural resources: Nitrate, copper, iron, lithium and other minerals, valleys suited for agriculture, and sea foods.

The Center:

Climate: Mild and temperate, with rains in winter.

Natural resources: Agricultural lands especially suitable for fruitgrowing, wine-growing, grazing lands, forests, hydroelectric power (rivers), copper and sea foods.

The South:

Climate: Temperate and rainy.

Natural resources: Agricultural and grazing lands, forests, hydroelectric power (rivers) and sea foods.

The Far South:

Climate: Cold steppe.

Natural resources: Forests, petroleum, natural gas, coal, limestone, sheep, and sea foods.

POPULATION (A)

GENERAL BACKGROUND:

According to past censuses, in 1835, Chile had a population of 1,103,036; in 1895, 2,695,625; in 1907, 3,231,022; in 1940, 5,023,539; in 1960, 7,374,115; in 1970, 8,884,768; in 1982, 11,329,736; in 1992 13,348,401; and the latest 2002 population census registered 15,116,435 inhabitants which for 2006 was estimated at 16,432,674 inhabitants.

This steady growth of the population is mainly due, on one hand, to moderately high birth rates (until 1962, the birth rate was 38 in a thousand, on average) and a decreasing mortality rate, and on the other hand, to an increasingly longer life expectancy (from 67.2 years in 1975 to 70.7 years in 1980 to 75.4 years in 1999 and to 77.08 years in 2002).

In recent years, the population has a higher proportion of elderly people due to a fertility rate fall associated to a birth rate that has dropped to around 1.65% a year, in 2002, while overall mortality is 0.53%. This brings population growth to 1.12% a year.

Until 1930, the population was predominantly rural: in 1875, 65.1% and in 1920, 53.6%. The 1940 census reversed the situation and according to the census of 2002, only 13.4% of the population is rural.

The population density is currently 20 inhabitants per square kilometer, (2002 census) one of the lowest density figures in Latin America. However, it should be held in mind that over 70% of Chilean territory in South America is desert, mountainous or otherwise inhospitable for human settlement.

(*) Data on air pollution provided by the automatic network of the Santiago Metropolitan Service of Environmental Health (Sesma).

(1) The SO₂ figure in 2006 corresponds to the global annual average mean. From 2002 through 2005 this figure corresponds to the monthly annualized mean.

SYSTEM OF GOVERNMENT AND POLITICAL AND ADMINISTRATIVE ORGANIZATION

According to the Political Constitution of 1980, Chile is a unitarian state. For interior administration and government, the country is divided into regions and these into provinces. For local administration, the provinces are divided into communes.

Regional government is the responsibility of the Intendent, who is the immediate representative of the President of the Republic and is answerable directly to him.

At the head of the regional administration is the Regional Government with full legal capacity and its own assets. It consists of the Intendent, its maximum authority, and the Regional Council which has normative, resolving and supervisory capacities.

Provincial government corresponds to the Governor, also answerable directly to the President of the Republic and subordinate to the Intendent. He administrates in representation of the Intendent and is assisted by a consultative Provincial Social and Economic Council of which he is the Chairman and he may also constitute a Technical Advisory Committee.

Local communal administration is carried out by the Municipality, an autonomous public body with full legal capacity and its own assets. It consists of the Mayor and his Council with normative, resolutive and supervisory capacities. At the same time, each commune has a Communal Social and Economic Council, chaired by the Mayor, which has consultative duties. The Mayor is the chairman of the Council and, is elected by public vote. The councillors are proportionally elected by public vote.

Most of the Ministries and National Public Services are decentralized territorially by way of Ministerial Regional Secretariats and Regional or Provincial Directions respectively, the latter being subordinated to the Ministerial Regional Secretariat and both subordinate to the Intendent.

Furthermore, in each region there is a Regional Cabinet to assist the Intendent integrated by Governors, Ministerial Regional Secretaries and by regional heads of state administration nominated by the Intendent.

(1) Estimated figures at 30 June of each year, on the basis of the 2002 census.

(2) Life expectancy at birth is the number of years a newborn infant is expected to live.

(3) Life expectancy at one year is the number of years a one-year old infant is expected to live.

THE REGIONS AND THEIR CAPITALS:

Decree Law 575 (10 July, 1974), divided the Chilean territory into thirteen regions:

NAME	CAPITAL
I Region of Tarapacá	Iquique
II Region of Antofagasta	Antofagasta
III Region of Atacama	Copiapó
IV Region of Coquimbo	La Serena
V Region of Valparaíso	Valparaíso
VI Region of Libertador General Bernardo O'Higgins	Rancagua

Structural balance as percentage of GDP (6)	0.6	0.7	1.0	1.0	1.0

(1) Provisional figures.

(2) Preliminary figures.

(3) The Central Government comprises those government units whose sphere of action extends to the whole national territory.

(4) It is the current-expenditure transfers' concept of the budgetary classifying criterion used by the National Budget Law.

(5) In traditional presentations it is part of operational income.

(6) Corresponds to the balance of the Central Government if GDP growth were that of its trend level and if the copper price were that of the long-term level.

(1) Generating capacity supplying the four interconnected electric systems (grids) covering the country—understood as Chile's South American territory, that is, excluding Chile's Antarctic and Pacific territories—namely, (i) the Northern Grid (SING) which extends from Arica to Antofagasta, covering 24.5% of the country; (ii) the Central Grid (SIC) which extends from Taltal in the north to the island of Chiloé in the south, covering 43% of the country, with 93% of the population; and (iii) the two independent grids of Aisén and Magallanes in the southernmost part of Chile, which together cover 31.8% of the country, with only 1.6% of the population.

(2) One megawatt hour (MWh) equals one million watt hours, and one gigawatt hour (GWh) equals one thousand megawatt hours.

(3) Public services are the firms that generate power to sell to third parties. They are connected to the four grids supplying the country. Self-producers are the firms that generate electric power for their own consumption.

Deposits	1.59	1.39	1.63	2.94	4.38
Loans	3.83	3.37	2.95	4.44	5.77

(1) Includes banks and financial institutions during the 1999-2003 period.

(2) Total: domestic and foreign currencies.

(3) Commercial and consumption loans include overdrafts.

(4) Only banks.

(5) Less than 30-day demand deposits.

(6) 30-day demand deposits and over.

(7) Average weighted rates on all operations carried out by banks and financial institutions. As from January 2003, the financial system includes only banks.

(8) Annualized interest rates (360-day) by simple interest conversion.

(9) Loan and deposit rates difference.

(10) Loan and deposit rates difference, less cost of reserve requirement.

(11) Gross and net spreads difference.

(12) Annualized rate on exchange rate variation.

(13) Annual rate includes only banks.

Nominal mean cost (3) (pesos of January 2006)	484,771	501,951	516,569	522,651	543,737

(1) The concept of earning refers to the set of payments in money and in kind of monetary value that an employee should receive from his employer according to a work contract for his work and function. Expenses incurred to the employer, corresponding to reimbursement of expenses incurred to the employee due to the work itself and any sporadic payment that the employer might make, are excluded.

(2) Figures deflated by consumer price index (CPI).

(3) The labor cost results from the salaries paid plus the cost to the employer of refunding expenses incurred to the employee, costs of training and staff welfare services, less certain social security payments that the employer has to make (for example family allowances given by the state). Any indemnization paid to the employee for termination of contract and any sporadic payments are excluded.

(4) Corresponds to the minimum legal amount an employer must pay to any private-sector worker between 18 and 65 years old, not included in any special category of work. This amount is used to calculate the worker's minimum legal contribution to his pension fund.

	2002	2003	2004	2005	2006

Infant mortality rate (per 1,000 people) (A) (4)	7.7	7.8	8.5	(n.a.)	(n.a.)

(1) Average of effective years of school attendance by the employed workforce, which is 15 year of age and older. Each year's average has been calculated by the Publications Department of the Central Bank of Chile on the basis of the quarterly results published by INE's National Employment Surveys.

(2) Percentage of population 15 year of age and older unable to read and write a short sentence.

(3) Ratio between the number of effective registered schoolchildren at a given level and the corresponding age group of the national population.

(4) Number of deaths of less than one-year old infants, per 1,000 newborns.

(5) The labor cost results from the salaries paid plus the cost to the employer of refunding expenses incurred to the employee, costs of training and staff welfare services, less certain social security payments that the employer has to make (for example family allowances given by the state). Any indemnization paid to the employee for termination of contract and any sporadic payments are excluded.

(1) Percentage calculated by the source on the basis of the estimated population at December of each year.

(2) Includes all beneficiaries from the public health insurance administrated by the Fondo Nacional de Salud, Fonasa (national health fund) at December of each year.

(3) Includes all beneficiaries of the private health insurance administrated by the system of health insurance institutions (Isapres) at December of each year.

(4) Includes individuals and members of the Armed Forces, not covered by the public or private health systems.

(5) Lines operating in 2004 are not comparable to the ones of previous years due to the change on equivalence carried out on residential telephone lines – 30 voice channels and high traffic. The above explains why despite the growing number of lines in use, figures decrease.
