## MAP OF CHILE BY REGIONS

## GENERAL BACKGROUND (A)

### LOCATION AND AREA:

Chile is located in the southwest of South America stretching as far south in the Antarctica as to the South Pole itself and with its westernmost province, Easter Island, in the South Pacific Ocean.

On the American continent, Chile stretches from 17°30' S at the northern boundary to 56°32' S at the southernmost tip of South America.

The Chilean Antarctic Territory comprises the whole of the area located south of the 60° S, between meridians 53° and 90° W as far as the South Pole at 90° S.

The national territory comprises several islands in the Pacific Ocean, which add to the country's territorial waters. The nearest to the continent are the islands that form the Juan Fernández archipelago, and San Félix and San Ambrosio islands. The most distant from the mainland are Salas y Gómez and Easter Island or Rapa Nui.

The latter is located at 27° S and 109°30' W, opposite the port of Caldera and 3,760 kilometers away from the mainland.

From the Concordia line to the South Pole, the country is over 8,000 kilometers long. The area of South American, Antarctic and Oceanic Chile is 2,006,096 sq km, with 756,096 sq km corresponding to South American and insular Chile and 1,250,000 sq km to the Chilean Antarctic Territory.

| SOUTH AMERICAN AND INSULAR CHILE | 756,096 sq km   |
|----------------------------------|-----------------|
| Cropland                         | 16,560 sq km    |
| Grazing land                     | 129,300 sq km   |
| Forest land                      | 84,200 sq km    |
| Non-productive land              | 526,036 sq km   |
| CHILEAN ANTARCTIC TERRITORY      | 1,250,000 sq km |
| TOTAL                            | 2,006,096 sq km |

### BOUNDARIES

Chile is bounded on the north by Peru, by a border line known as "Línea de la Concordia"; on the east by Bolivia and Argentina, mainly by a line that runs through the highest summits of the Andes; on the south by the South Pole, and on the west by the Pacific Ocean, including 200 nautical miles of territorial waters.

### CLIMATE AND NATURAL RESOURCES :

#### **The North:**

Climate: Warm desert.

Natural resources: Nitrate, copper, iron, lithium and other minerals, valleys suited for agriculture, sea foods.

#### **The Center:**

Climate: Mild and temperate, with rains in winter.

Natural resources: Agricultural lands especially suitable for fruitgrowing, grazing lands, forests, hydroelectric power (rivers), copper, sea foods.

#### **The South:**

Climate: Temperate and rainy.

Natural resources: Agricultural and grazing lands, forests, hydroelectric power (rivers), sea foods.

#### **The Far South:**

Climate: Cold steppe.

Natural resources: Forests, petroleum, natural gas, coal, limestone, sheep, sea foods.

## POPULATION (A)

### GENERAL BACKGROUND:

According to past censuses, in 1835, Chile had a population of 1,010,336; in 1895, 2,695,625; in 1907, 3,220,531; in 1940, 5,023,539; in 1960, 7,374,115; in 1970, 8,884,768; in 1982, 11,329,736; in 1992 13,348,401; and the latest 2002 population census registered 15,116,435 inhabitants.

This steady growth of the population is mainly due, on one hand, to moderately high birth rates (until 1962, the birth rate was 37.5 in a thousand, on average) and a decreasing mortality rate, and on the other hand, to an increasingly longer life expectancy (from 67.2 years in 1975 to 70.7 years in 1980 and to 75.4 years in 1999).

In recent years, the population has a higher proportion of elderly people due to a fertility rate fall associated to a birth rate that has dropped to around 2.2% a year, while overall mortality is 0.6%. This brings population growth to 1.7% a year.

Until 1930, the population was predominantly rural: in 1875, 65.1% and in 1920, 53.6%. The 1940 census reversed the situation and according to the census of 1992, only 16.5% of the population was rural. In accordance with a June 30 2002 projection the rural population is 14.0% only.

The population density is currently 17.6 inhabitants per square kilometer, (1992 census) one of the lowest density figures in Latin America. However, it should be held in mind that over 70% of Chilean territory is desert, mountainous or otherwise inhospitable for human settlement.

## SYSTEM OF GOVERNMENT AND POLITICAL AND ADMINISTRATIVE ORGANIZATION

According to the Political Constitution of 1980, Chile is a unitarian state. For interior administration and government, the country is divided into regions and these into provinces. For local administration, the provinces are divided into communes.

Regional government is the responsibility of the Intendent, who is the immediate representative of the President of the Republic and is answerable directly to him.

At the head of the regional administration is the Regional Government with full legal capacity and its own assets. It consists of the Intendent, its maximum authority, and the Regional Council which has normative, resolving and supervisory capacities.

Provincial government corresponds to the Governor, also answerable directly to the President of the Republic and subordinate to the Intendent. He administrates in representation of the Intendent and is assisted by a consultative Provincial Social and Economic Council of which he is the Chairman and he may also constitute a Technical Advisory Committee.

Local communal administration is carried out by the Municipality, an autonomous public body with full legal capacity and its own assets. It consists of the Mayor and his Council with normative, resolute and supervisory capacities. At the same time, each commune has a Communal Social and Economic Council, chaired by the Mayor, which has consultative duties. The Mayor is both councillor and chairman of the Council and, like the other councillors, is elected by public vote. The councillor that obtains the first majority is elected Mayor, if his list or pact gets at least 30% of the votes.

Most of the Ministries and National Public Services are decentralized territorially by way of Ministerial Regional Secretariats and Regional or Provincial Directions respectively, the latter being subordinated to the Ministerial Regional Secretariat and both subordinate to the Intendent.

Furthermore, in each region there is a Regional Cabinet to assist the Intendent integrated by Governors, Ministerial Regional Secretaries and by regional heads of state administration nominated by the Intendent.

## THE REGIONS AND THEIR CAPITALS:

Decree Law 575 (July 10th, 1974), divided the Chilean territory into thirteen regions:

|      | NAME  | CAPITAL      |
|------|---|--------------|
| I    | Region of Tarapacá                              | Iquique      |
| II   | Region of Antofagasta                           | Antofagasta  |
| III  | Region of Atacama                               | Copiapó      |
| IV   | Region of Coquimbo                              | La Serena    |
| V    | Region of Valparaíso                            | Valparaíso   |
| VI   | Region of Libertador General Bernardo O'Higgins | Rancagua     |
| VII  | Region of Maule                                 | Talca        |
| VIII | Region of Biobío                                | Concepción   |
| IX   | Region of La Araucanía                          | Temuco       |
| X    | Region of Los Lagos                             | Puerto Montt |
| XI   | Region Aisén del Gral. Carlos Ibáñez del Campo  | Coihaique    |
| XII  | Region of Magallanes y de La Antártica Chilena  | Punta Arenas |
| RMS  | Santiago Metropolitan Region                    | Santiago     |

Regions with largest population:

|                              |                       |
|------------------------------|-----------------------|

## NOTES

- (1) Average rainfall of a 30-year period (1961-1990).
- (2) Data on air pollution provided by the automatic network of the Santiago Metropolitan Service of Environmental Health (Sesma).
- (3) A new automatic monitoring network (MACAM2-RM) was applied since 1997 on.
- (4) Estimated figures at June 30th of each year, based on the 1992 census.
- (5) Life expectancy at birth is the number of years a newborn infant is expected to live.
- (6) Life expectancy at one year is the number of years a one-year old infant is expected to live.
- (7) Including financial services, insurance, rental of premises and services provided to firms.
- (8) Including education and health care services and other services.
- (9) Years 1999, 2000 and 2002 include capital profits due to selling of shares (privatization of state-owned firms) to the amount of \$83,252 million; \$381,400 million and \$33,835 million, respectively in currency of year 2002.
- (10) Including discounted tax returns.
- (11) Including Codelco's payments to the Treasury (surpluses and taxes) from which deposits accrued by the Treasury in the Copper Compensation Fund (FCC) have been deducted. Excluding Codelco's payments to the Armed Forces according to Law 13,190.
- (12) In this item FCC stands for Copper Compensation Fund and FEPP stands for Petroleum Price Stabilization Fund.
- (13) Agricultural year "n" is understood to mean the period elapsed since sowing took place in year "n-1" until harvest takes place in year "n".
- (14) Including carcass meat of broilers, turkey, hens and others.
- (15) Including production of dried, salted, smoked, agar-agar, and colagar products.
- (16) As from Cochilco's August 2002 issue, copper production is arranged as: mine, smelting and refining as to comply with international classification standards.
- (17) Including 93-octane leaded gasoline and 93- 95- and 97-octane unleaded gasoline.
- (18) Including domestic and aviation kerosene.
- (19) As from 1998 there is not data on newsprint, pulp and sheet glass.
- (20) Refers to a group of 73 one-storey dwellings of 69.80 square meters each.
- (21) Information referring to the private sector corresponds to approved construction permits. Information referring to the public sector corresponds to construction already under way.
- (22) Electric calorific equivalent: 860 Kcal/KWh.
- (23) Including regular gas, blast-furnace gas, natural gas, methanol and biogas.
- (24) Including private and state-owned railways.
- (25) Including private cars, hired cars and taxis, station wagons and ambulances.
- (26) Including pickup trucks, trucks and vans.
- (27) Including motor-scooters, motorcycles, tractors, and other motorized vehicles.
- (28) Corresponding to the annual average number of tourism hotels providing information.
- (29) December to December change.
- (30) Mean annual import price cif according to specified place of origin.
- (31) Information on banks under dissolution is excluded.
- (32) Annualized interest rates (360-day basis) by simple interest conversion.
- (33) Corresponds to the new Balance of Payments series, calculated with a new methodology which changed the definition of international reserves to comply with the fifth edition of the IMF's Balance of Payments Manual. For more details see page 15 of the *Economic and Financial Report*, May 2002.
- (34) According to the International Monetary Fund Manual on Balance of Payments, exports must be registered at the time goods change hands and not when they pass through Customs. Since the statistics of export shipments given herein are taken from Customs declarations they must be adjusted to come more in line with the Manual definition. The most important adjustment is the replacement of copper and molybdenum shipments by their sales abroad.
- (35) Data on registered imports are gathered from importers' declarations legally recorded by the National Customs Service. Hence, those imports not subject to a Customs declaration (postal remittances, simplified procedures, legal exceptions, duty free zone) are not included, but they do conform to the balance of payments concept of imports. In addition, crude oil customs declarations are replaced by purchases abroad effected by the National Petroleum Company (Enap).
- (36) Applications made each year according to DL 600 of October 1974 and DL 1748
