7 ECONOMIC AND FINANCIAL REPORT JULY 2002

11 CHILE'S FOREIGN DEBT AT 30TH JUNE 2002

13 STATISTICAL TABLES

13 I. PRODUCTION AND EMPLOYMENT

- 13 Monthly Indicator of Economic Activity (IMACEC)
- 15 Quarterly gross domestic product by type of economic activity
- 17 Gross domestic product by type of economic activity (At constant price)
- 17 Gross domestic product expenditure (At constant price)
- 17 Gross domestic product expenditure (At current price)
- 18 Quarterly gross domestic product expenditure
- 19 Product income (At constant price)
- 19 Product income (At current price)
- 19 Product income relation
- 20 Quarterly gross domestic product (At current price)
- 21 Quarterly product income (At current price)
- 22 Quarterly gross domestic product (At constant price)
- 23 Industrial output indexes
- 24 Industrial sales indexes
- 25 Employment and unemployment (INE)
- 26 National employment and unemployment seasonally adjusted series (INE)
- 27 Employment and unemployment in Greater Santiago (Univ. of Chile)
- 28 Public and private sector building approved and underway
- 29 Mining production index

30 II. MONEY, CREDIT AND INTEREST

- 30 Monetary base: sources of changes (Monthly balance)
- 31 Monetary base and currency (Monthly average)
- 32 Private money (M1A) (Monthly average)
- 33 Total private financial savings (M7) (Monthly average)
- 34 Private monetary aggregates (Monthly average)
- 35 Short-term private monetary aggregates, seasonally adjusted (Monthly average)
- 36 Detail of private monetary aggregates (Monthly average)
- 37 Central Bank of Chile assets and liabilities (Monthly balance)
- 38 Banking-sector assets and liabilities (Monthly balance)
- 39 Government sector's money stock (Monthly average)

- 40 Loans in domestic currency (Monthly average)
- 41 Loans in domestic currency (Percentage change)
- 42 Loans in foreign currency (Monthly average)
- 43 Loans in foreign currency (Percentage change)
- 44 Interest rates on the main Central Bank of Chile instruments
- 45 Average interest rates of the financial system

46 III. PRICES, SALARIES AND EXCHANGE BALANCES

- 46 Price indexes
- 47 Index of hourly wages
- 48 Labor cost index
- 49 Average of the observed and reference exchange rates
- 50 Multilateral exchange-rate index (TCM)
- 51 Real observed exchange rate (TCR)
- 52 External price indexes relevant to Chile (EPI)
- 53 Exchange balance of the formal exchange market (MCF)
- 54 Amount of forward operations in currencies within the MCF
- 55 Amount and price of forward operations (peso/dollar) within the MCF
- 56 Amount and price of forward operations (UF/dollar) within the MCF

57 IV EXTERNAL SECTOR

- 57 Balance of payments by quarter
- 58 Trade balance and balance of payments
- 59 Trade balance by country
- 60 Exports of goods
- 61 Exports by economic activity
- 62 Mining exports
- 63 Agriculture, livestock, forestry and fishing exports
- 64 Manufacturing exports
- 65 Non-traditional exports of general regime
- 68 Export shipments by country (fob)
- 69 Imports of goods
- 70 Imports of general regime by commodity group (cif)
- 71 Seasonally adjusted total imports and non-oil imports (cif)
- 72 Imports by country and type of goods (fob)
- 75 Annual index of goods-export volumes, prices and values
- 75 General regime. Annual index of goods-export volumes, prices and values
- 76 Quarterly index of goods-export volumes, prices and values

76	General regime. Quarterly index of goods-export volumes, prices and values
77	Annual change in volume, price and value of goods export
77	General regime. Annual change in volume, price and value of goods export
78	Quarterly change in volume, price and value of goods export
78	General regime. Quarterly change in volume, price and value of goods export
79	Annual index of goods import volumes, prices and values
79	Quarterly index of goods import volumes, prices and values
80	Annual change in volume, price and value of goods import
80	Quarterly change in volume, price and value of goods import
81	Price of copper, fishmeal, crude oil and pulp
82	International reserves of the Central Bank of Chile
83	Reserve assets: sources of change
84	International assets and liabilities of the Central Bank of Chile and of the financial system
85	Chilean investment abroad via chapters XII and XIII of the compendium of foreign exchange regulations (CNCI) (Annual flow)
86	Investment abroad via chapters XII and XIII of the compendium of foreign exchange regulations (CNCI) (Net annual flows)
87	Investment abroad via chapters XII and XIII of the compendium of foreign exchange regulations (CNCI) by economic activity (Net flows)
88	Investment abroad via chapters XII and XIII of the compendium of foreign exchange regulations (CNCI) by country of destination (Net flows)

ECONOMIC and Financial Report

July 2002

The Monthly Indicator of Economic Activity (IMACEC) was 0.9% higher in May 2002 than in the same month last year, bringing the average increase in the first five months of this year to 1.9%. Growth was held back by reduced activity in manufacturing and mining as well as weak results from the transport and communications sectors. Moreover, May this year had one working day less which brings the IMACEC down by between 0.5 and 1 percentage point. The index at factor cost registered an increase of 0.9% in May compared to the same month last year while the seasonally adjusted index was 0.1% up on April.

The consumer price index (CPI) in July rose 0.4%, bringing inflation in the past twelve months to 2.6%. Core inflation (CPIX), excluding prices of fresh fruit and vegetables and fuels, reached 0.1% in the month, bringing its twelve-month growth down to 2.5%.

The main price increases were in food (0.6%), housing (0.1%) and transport (2.4%) while the prices of education and recreation remained unchanged. Prices in the other groups went down: household goods (-0.2%), clothing (-0.6%), health (-0.2%) and miscellaneous goods (-0.8%).

Prices of both tradable goods (CPIT) and nontradable goods (CPIN) increased by 0.4% and 0.5% respectively, bringing their growth in the past twelve months to 2.5% and 2.7% respectively.

Wholesale prices (WPI) rose by 3.0% in July, with locally produced goods up by 1.8% and imported goods by 6.7%. Wholesale prices have thus gone up by 7.1% in the past year with locally produced goods rising 6.3% and imported goods 9.5%.

According to the National Statistics Bureau (INE), industrial output in June was 2% less than a year ago reflecting the drop in production of durable consumer goods (-8.8%), intermediate consumer goods (-1.6%), capital goods (-6.4%) and regularly consumed goods (-2.2%).

INE found that industrial sales were 5.6% less than in June 2001. Durable consumer goods were the worst hit with sales falling by 13%, followed by intermediate consumer goods (-8.2%) and regularly consumed goods (-1.8%). Sales of capital goods, on the other hand, registered 21% growth.

According to the Manufacturing Development Association (SOFOFA), industrial output in June was 3.8% down on a year ago while industrial sales dropped by 4.6%.

INE's national employment survey in the April through June moving quarter registered employment growth of 1.0% since the same period of 2001 with a 0.8% increase in the workforce. The national

unemployment rate thus reached 9.5%, 0.4 percentage points up on the preceding moving quarter but slightly lower (0.2 percentage points less) than in the same three months last year. Allowing for seasonal factors, unemployment dropped to 9.0%.

In the Santiago Metropolitan Region, unemployment in the second quarter dropped to 8.4%, 0.5 percentage points down on the same quarter of 2001 and 0.2 percentage points less than in the preceding moving quarter.

The University of Chile's survey of Greater Santiago registered unemployment of 13.6% in June which is 1.4 percentage points lower than in June 2001 but 0.3 percentage points higher than three months ago.

Nominal earnings in June, as measured by the hourly-earnings index and the labor-cost index, continued to grow more slowly registering only 4.4% and 4.5% growth respectively since a year ago. Moreover, in real terms, earnings growth is also sluggish, with hourly earnings increasing by only 2.4% and labour costs rising by 2.5%.

Interest rates in general fell during July. Interest on Central Bank instruments and on market transactions was lower, in line with the lower monetary policy rate announced on 11th July. Nominal Central Bank papers were traded on average at 50 to 60 basis points less than in June, the rates on 90-day PDPC averaging 3.51%, on 360-day PDPC 3.95% and on 2-year papers 4.79%.

Market rates on nominal deposits in general followed the same trend. Among the nominal financial system transactions, interest rates on 90 to 365-day loans dropped more than 100 basis points in July to average 13.8%. However, it should be noted that this segment of the nominal market has been the most stubborn in reacting to the Banco Central's interest rate reductions and only now in July it appears to be coming into line.

Interest rates on 90- to 365-day indexed transactions dropped in July mainly because of the lower rates announced early in the month. Deposits in UF thus averaged 1.58% while lending rates averaged 4.20% (tables 28 and 29).

Short-term monetary aggregates contracted in July, with money in circulation being reduced by 0.6% and broad private money (M1A) by 1.0%, mainly because of seasonal factors typical of this time of year. Their annual nominal growth rates thus continued to be over 10% similar to the trend observed since end-2001. Base money averaged growth of 1.1% in the same period.

The nominal exchange rate in July averaged 696.3 pesos to the dollar, a depreciation of 3.3% in the month. The multilateral exchange rate (TCM) depreciated by 3.7% while the five main currencies exchange rate (TCM5), which considers the US dollar, Canadian dollar, yen, pound sterling and euro, depreciated by 5.6%. Both exchange rates in real terms (TCR and TCR5) depreciated by 3.1% and 5.9% respectively in June.

The trade balance at end-June registered a US\$313.6 million surplus with exports totalling US\$1,675 million and imports US\$1,361.4 million.

The value of total exports increased by 9.5% the same as they had done in June 2001. Copper exports expanded by a healthy 22.1% compared to June 2001 while non-copper exports increased by 2.5% with main non-copper exports up by 4.3% whereas nontraditional exports edged down 0.4%. Other less important components of the trade balance (free zone, non-monetary gold, etc.) have increased by 9.6% in the past twelve months.

The value of total imports again dropped in June, 5.4% down on the same month last year. Capital-goods imports were the most reduced, down by 8.4% and intermediate goods dropped 5.7%, but consumer-goods imports increased by 8.7%.

Net foreign currency holdingss in July amounted to US\$15,098.8 million, US\$124 million less than in June. This drop in reserves was caused by the Treasury reducing its operational deposits held in the Central Bank which was only partially compensated by interest gains from the portfolio and by bank deposits. The Central Bank did not carry out any exchange transactions this month.

CHILE'S FOREIGN DEBT

at 30th June 2002

Chile's foreign debt totalled US\$38,818 million at 30th June 2002 which is US\$1,145 million more than at end-December 2001. 83% of total debt corresponds to the private sector.

Medium- and long-term foreign loan disbursements in the first half of the year amounted to US\$2,334 million and 52% of this, equivalent to US\$1,224 million, went to the private sector.

Sources of medium- and long-term foreign financing in 2002 to date have been international financial institutions (45%), bond issues (37%), companies associated with foreign investment and suppliers (11%) and multilateral and government organizations (7%).

In the same period, amortizations of medium- and long-term foreign debt amounted to US\$2,135 million, of which US\$295 million correspond to the public sector and US\$1,840 million to the private sector. 76% of total amortizations were made to international banks and financial institutions, 14% to companies associated with foreign investment and suppliers, 9% to multilateral and government organizations and the remaining 1% to bond recovery.

Foreign debt of one-year maturity according to residual term amounted to US\$7,480 million at 30th June 2002 and represented 19% of total borrowing. This amount comprises US\$4,886 million in loans with a term of more than one year that will mature during the next twelve months and US\$2,594 million in loans with an original term of up to one year (table 70).

(1) Provisional figures corresponding to the new IMACEC based on the 1996 input-output matrix. This indicator covers almost all the economic activities included in the GDP.

(2) Computed on the basis of the X-12 ARIMA model available at www.census.gov. The seasonally adjusted series excludes the seasonal effects of Easter, leap years and holidays. This series is not strictly comparable to the quarterly seasonally adjusted GDP growth, because the results of the seasonal adjustment procedures are not equivalent when applied to different frequency series (in this case: GDP and IMACEC).

(3) The cyclical tendency series corresponds to the seasonally adjusted series dismissing the irregular component. The ARIMA model selected is (0,1,1)(0,1,1).

(4) Corresponding to the original series minus indirect taxes.

(5) Change of the cumulative average of a period ending in the specified month as compared to the same period of the previous year.

(6) December to December change.

2. Quarterly gross domestic product by type of economic activity ⁽¹⁾

(Millions of 1996 pesos)

Activity	2000				
	Quarter I	Quarter II	Quarter III	Quarter IV	Year
Agriculture, livestock and forestry	608,196	549,597	177,366	189,192	1,524,351

- (1) Computed on the basis of the X-12 ARIMA model available at www.census.gov. The seasonally adjusted series excludes the seasonal effects of Easter, leap years and holidays. The seasonal moving average used is 3x9 and the ARIMA model selected is (0,1,2) (0,1,1). In order to improve the seasonality component, as from March 2001 the method to correct the holidays was modified. The original series was seasonally adjusted for the 1986-2001 period. The overlapping of the 1986-1995 period with base on 1986 was made preserving the interannual quarterly rate on said basis.
- (2) The quarterly seasonally adjusted GDP series growth is not strictly comparable to the quarterly seasonally-adjusted IMACEC growth, because the results of the seasonal adjustment procedures are not equivalent when applied to different frequency series (in this case: GDP and IMACEC).
- (3) Provisional figures, including new calculation of home ownership.
- (4) Preliminary figures, including new calculation of home ownership.

(1) The series has been seasonally adjusted on the basis of the X-12 ARIMA model (available at www.census.gov) including the effects of Easter, leap years, and a vector that adjusts to the number of weekdays, taking holidays into account.

The seasonal moving average of Henderson used is 3x9.

(2) The ARIMA model used is (0,1,2).

(3) The ARIMA model used is (2,1,0).

(4) The ARIMA model used is (0,1,1).

(5) Provisional figures for the original series.

Symbols:

C: Currency in circulation.

D1A: Nonfinancial private-sector checking accounts and other demand deposits net of float, less deposits of the Treasury Banking Account, plus demand savings deposits. Float corresponds to documents received by the banks extended against all type of deposits (public, private and interfinancial).

Dp: Time deposits of private sector.

Ahp: Time savings deposits, including those for housing.

(*) Provisional information obtained through daily reports provided by the financial system.

- (1) Corresponds to the mean weighted trading rate in that month, on promissory notes sold by tender.
- (2) Real annual rates corresponding to the monetary policy rate established by the Central Bank of Chile. Until 8 August 2001 the annual interest rate was applied over the UF change. As from 9 August 2001, the Central Bank of Chile decided to use a nominal monetary policy rate, setting it at 6.5% a year.
- (3) Nominal rates with annual base on promissory notes sold by tender.
- (4) Annual rates indexed in accordance with the UF change on promissory notes sold by tender.
- (5) Annual rate on the observed exchange rate.
- (6) As from 28 July 1992 the Central Bank of Chile agrees to accept UF300,000 in each tender. The UF is an indexed unit (based on consumer prices change).
- (7) As from 16 February 1993 the Central Bank of Chile agrees to accept UF200,000 in each tender.

29. Average interest rates of the financial system

(Percentage)

(1) The multilateral exchange-rate index (TCM) is a measure of the nominal value of the Chilean peso with respect to a wide basket of foreign currencies. See note on methodology in the *Economic and Financial Report* of January 2000. As from January 2001 the TCM includes China and Sweden. (See note on methodology, page 15 of the *Economic and Financial Report* of March 2001).

(2) The TCM 5 refers to the currencies of The United States, Japan, The United Kingdom, Canada and the Euro area.

(3) Average annual change.

(4) December to December change.

35. Real observed exchange rate (TCR)

(1986 Average = 100)

- (1) The real exchange rate is the observed nominal exchange rate multiplied by the quotient between relevant external inflation and the domestic consumer price index (CPI). External inflation is calculated using the WPI, in dollars, of Chile's main trading partners, weighted according to their relative importance in terms of imports and exports - excluding oil and copper. Trade with them was approximately 82% of Chile's total trade in 1997, excluding oil and copper. Both the WPI and the countries' exchange rates are in terms of monthly variations. As from January 2001 the real observed exchange rate (TCR) includes China and Sweden. (See note on methodology, page 15 of the *Economic and Financial Report* of March 2001).
- (2) Same definition as (1) but considers the following industrialized countries: The United States, Japan, the United Kingdom, Canada and the Euro-area countries (Germany, France, Spain, Italy, the Netherlands and Belgium). For fuller information on the new TCR 5 index which refers to the five main industrialized countries trading with Chile see the *Economic and Financial Report* of January 2000.
- (3) Average annual change.
- (4) December to December change.
- (5) Provisional figures.

(1) Provisional figures, including banks and money exchange bureaus of the formal exchange market (MCF).

(2) Data at end of each month, unless otherwise stated.

(3) Represents balance at end of each month, of cash exchange position of banks and money exchange bureaus of the MCF.

(4) Represents purchases less forward sales at the specified date, including operations in pesos and indexed units (UF).

Plus sign : Purchase net balance.

Minus sign : Sales net balance.

(5) Spot balance plus forward balance.

(6) As from 31 May 2002, includes operations carried out pursuant to Chapter IV D.1 of the Compendium of Financial Regulations (CNF) of the Central Bank of Chile and foreign currencies' exchange operations (other than dollar) with Chilean pesos and UFs.

Minus sign : Sales net balance.

38. Amount of forward operations in currencies within the MCF (formal exchange market) (*)

(1) Provisional figures.

(2) Trade Balance figures represent actual imports and exports, based on statistics of the National Customs Service to which the pertinent coverage and valuation adjustments have been made in order to arrive at the figures used in the Balance of Payments.

(3) Balance of Payments: Corresponds to changes in international reserves resulting from balance of payments transactions excluding changes in reserves such as those produced by revaluations, gold monetization and allocation of SDRs. For further explanation refer to the *Boletín Mensual* of the Central Bank of Chile (April, 1981). As from 1993, figures have been calculated to incorporate price restatement of assets.

(*) Provisional figures. Classification of imports has been modified to bring it into line with that of National Accounts. The modification affects figures as from 1990. In consideration of the nature of the goods and also the specific uses to which they may be put, certain consumer- and capital-goods imports had to be reassigned to the intermediate-goods category. In some cases the category has been determined by the end use.

53. Seasonally adjusted total imports and non-oil imports⁽¹⁾

(1) Provisional figures. The export-price index corresponds to the Paasche index, while the volume index corresponds to the Laspeyres quantum index. Both are calculated with base 1996 = 100, so the changes registered do not coincide with the figures given in table 57. These calculations exclude exports of rapairs on goods.

(2) General regime exports only.

(3) Gold excluded.

56. Quarterly index of goods-export volumes, prices and values (1)

(1) Provisional figures. The export-price index corresponds to the Paasche index, while the volume index corresponds to Laspeyres quantum index.
Both are calculated with base 1996 = 100, so the changes registered do not coincide with the figurates given in table 60.

(2) Repairs on goods excluded.

60. Annual change in volume, price and value of goods import (1)

(Percentage change on the same period of the previous year)

(1) Prices supplied by the London Metal Exchange (LME) and informed by the Chilean Copper Commission (COCHILCO).

(2) Average fob export price computed from shipment value divided by volume. Shipment values, provisionally reported by Customs' statements, are afterwards adjusted. In the previous series these corrections were imputed to the values of the month in which they were provided. The new series, instead, imputes them to the month of the statement being adjusted. For this reason the information of recent months may change again.

(3) Average cif import price from Customs' statements computed from shipment value divided by volume.

(4) Cumulative weighted average change of that month with respect to the annual average of the previous year (copper average is not weighted).

(5) These annual averages are not coincident with monthly figures, because monthly prices have been weighted by each month volume. However the annual average for copper is based on daily data.

(6) December to December change.

(-) Not available.

- a/ Data on Internet (www.bcentral.cl ; www.bolsantiago.cl ; or www.ine.cl).
- b/ The 12-month change of the economic activity index and the totals on imports, exports and trade balance are published on Internet (www.bcentral.cl under "new in this site"), between the 17th and the 23rd of each month, or the following working days if they were holidays. From the later date onward, these data, including additional and complementary information, are included in the "Informe Económico y Financiero", and in the permanent website. "Informe Económico y Financiero" is a fortnightly publication of the Banco Central, summarized in this monthly "Economic and Financial Report".
- c/ Deadline. Unless unforeseen circumstances, the exact dates of data releases are informed on Internet no later than the week prior to the data release (www.bcentral.cl, under "economic data"/"release of economic statistics")
- d/ Releasing is made before the beginning of transactions of the next working day.
- e/ Releasing is made the next day after the close of transactions.
- f/ On the first date, information covers the first half of the month in question, on the second and third dates, information of the whole month is given.

Economic and financial data available

(last date with information and source)

Data category	Last date with data (available from...)	Printed publication (acronym) 1/	Complementary data on Internet	Data producer

1/ These publications, excepting IDBCS and PSD, are also posted on Internet (PDF format). The acronyms meaning is as follows:

DGC Deuda del Gobierno Central (quarterly report on central government debt balances: Dirección de Presupuestos).
 ELP Ejecución Ley de Presupuestos (quarterly report on Budget Law execution: Dirección de Presupuestos). For more detailed data see 3/ .
 EyS Indicadores del mes. Empleo y Sectoriales (monthly bulletin on production and employment indicators : Instituto Nacional de Estadísticas).
 IDBCC Informativo Diario del Banco Central de Chile (daily report on financial indicators of the Banco Central).
 IDBCS Informativo Diario de la Bolsa de Comercio de Santiago (daily report of stock market indicators of the Bolsa de Comercio de Santiago).
 IEF Informe Económico y Financiero (fortnightly report on economic and financial data of the Banco Central)
 PyR Indicadores del mes. Precios y Remuneraciones (monthly bulletin on prices and wages indicators: Instituto Nacional de Estadísticas)
 TIP Tasas de Interés Promedio (Central Bank daily sheet on average interest rates).

2/ See on: www.bcentral.cl; www.bolsantiago.cl; www.dipres.cl; or www.ine.cl

3/ The first release is only through Internet. About end of April of the following year, a printed report ("Estadísticas de las Finanzas Públicas") is published. This report, is also posted on Internet and gives annual and more detailed data on general government, local government, central government, public enterprises and public sector. Data on central government and public enterprises cover until the last finalized year. Data on local government, general government and public sector cover until the year previous to the last finalized

4/ These data are only published on Internet (www.bcentral.cl under "Economic Data" and within "SDDS")
