7 ECONOMIC AND FINANCIAL REPORT JANUARY 2003

11 CHILE'S FOREIGN DEBT AT DECEMBER 31 ST 2002

13 STATISTICAL TABLES

13 I. PRODUCTION AND EMPLOYMENT

- 13 Monthly Indicator of Economic Activity (Imacec)
- 14 Quarterly gross domestic product by type of economic activity
- 17 Gross domestic product by type of economic activity (At constant price)
- 17 Gross domestic product expenditure (At constant price)
- 17 Gross domestic product expenditure (At current price)
- 18 Quarterly gross domestic product expenditure
- 19 Product income (At constant price)
- 19 Product income (At current price)
- 19 Product income relation
- 20 Quarterly gross domestic product (At current price)
- 21 Quarterly product income (At current price)
- 22 Quarterly gross domestic product (At constant price)
- 23 Industrial output indices
- 24 Industrial sales indices
- 25 Employment and unemployment (INE)
- 26 National employment and unemployment seasonally adjusted series (INE)
- 27 Employment and unemployment in Greater Santiago (Univ. of Chile)
- 28 Public and private sector building approved and underway
- 29 Mining production index

30 II. MONEY, CREDIT AND INTEREST

- 30 Monetary base: sources of changes (Monthly balance)
- 31 Monetary base and currency (Monthly average)
- 32 Private money (M1A) (Monthly average)
- 33 Total private financial savings (M7) (Monthly average)
- 34 Private monetary aggregates (Monthly average)
- 35 Short-term private monetary aggregates, seasonally adjusted (Monthly average)
- 36 Detail of private monetary aggregates (Monthly average)
- 37 Central Bank of Chile assets and liabilities (Monthly balance)
- 38 Banking-sector assets and liabilities (Monthly balance)
- 39 Government sector's money stock (Monthly average)

- 40 Loans in domestic currency (Monthly average)
- 41 Loans in domestic currency (Percentage change)
- 42 Loans in foreign currency (Monthly average)
- 43 Loans in foreign currency (Percentage change)
- 44 Interest rates on the Central Bank of Chile instruments
- 46 Average interest rates of the financial system

47 III. PRICES, SALARIES AND EXCHANGE BALANCES

- 47 Price indices
- 48 Index of hourly wages
- 49 Labor cost index
- 50 Average of the observed and reference exchange rates
- 51 Multilateral exchange-rate index (MER)
- 52 Real observed exchange rate (RER)
- 53 External price indices relevant to Chile (EPI)
- 54 Exchange balance of the formal exchange market (MCF)
- 55 Amount of forward operations in currencies within the MCF
- 56 Amount and price of forward operations (peso/dollar) within the MCF
- 57 Amount and price of forward operations (UF/dollar) within the MCF

58 IV EXTERNAL SECTOR

- 58 Balance of payments by quarter
- 59 Trade balance and balance of payments
- 60 Trade balance by country
- 61 Exports of goods
- 62 Exports of general tariff regime by economic activity
- 63 Mining exports
- 64 Agriculture, livestock, forestry and fishing exports
- 65 Manufacturing exports
- 66 Non-traditional exports of general tariff regime
- 67 Exports by country (fob)
- 70 Imports of goods
- 71 Imports of general tariff regime by commodity group (cif)
- 72 Seasonally adjusted total imports and non-oil imports (cif)
- 73 Imports by country and type of goods (fob)
- 76 Annual index of goods-export volumes, prices and values
- 76 General tariff regime. Annual index of goods-export volumes, prices and values
- 77 Quarterly index of goods-export volumes, prices and values

77	General tariff regime. Quarterly index of goods-export volumes, prices and values
78	Annual change in volume, price and value of goods export
78	General tariff regime. Annual change in volume, price and value of goods export
79	Quarterly change in volume, price and value of goods export
79	General tariff regime. Quarterly change in volume, price and value of goods export
80	Annual index of goods import volumes, prices and values
80	Quarterly index of goods import volumes, prices and values
81	Annual change in volume, price and value of goods import
81	Quarterly change in volume, price and value of goods import
82	Price of copper, fishmeal, crude oil and pulp
83	International reserves of the Central Bank of Chile
84	Reserve assets: sources of change
85	International assets and liabilities of the Central Bank of Chile and of the financial system
86	Chilean investment abroad via chapters XII and XIII of the compendium of foreign exchange regulations (CNCI) (Annual flow)
87	Investment abroad via chapters XII and XIII of the Compendium of Foreign Exchange Regulations (CNCI) (Net annual flows)
88	Investment abroad via chapters XII and XIII of the Compendium of Foreign Exchange Regulations (CNCI) by economic activity (Net flows)
89	Investment abroad via chapters XII and XIII of the Compendium of Foreign Exchange Regulations (CNCI) by country of destination (Net flows)
91	Foreign-investment flows
93	Foreign debt of Chile as at end of each period according to residual term
94	V. INTERNATIONAL INDICATORS
94	Price indices in USA
95	International interest rates
96	Parities of euro and yen
97	PUBLICATION OF ECONOMIC STATISTICS
97	Release of economic and financial data
98	Economic and financial data available
99	Economic forecasts

Economic and Financial Report

January 2003

Preliminary figures for the Monthly Indicator of Economic Activity (Imacec) in November register growth of 2.1% over the past year, bringing economic growth in the first eleven months of 2002 to an average of 1.8% a month.

The index at factor cost was 1.6% up on November 2002 while the seasonally adjusted index was 1.5% higher than in October. November this year had one working day less than last year.

The consumer price index (CPI) in January rose by a tiny 0.1% so annual inflation increased to 3.0%. Core inflation (CPIX), which excludes prices of fresh fruit and vegetables and fuels, was flat bringing its twelve-month growth to 1.7%.

The main price increases were in fuels and transport resulting in a 2.3% increase in transport and 0.4% in housing. Costs of education and recreation increased by 0.2%. These were offset by the lower prices of clothing (-1.4%) and food (-0.6%) that are usual at this time of year. Prices of health and miscellaneous goods also dropped by 1.1% and 0.2% respectively. Prices of household goods remained unchanged.

Tradable goods prices (CPIT) rose by 0.6% mainly due to the increase in fuels, while non-tradable goods prices (CPIN) dropped 0.3%, bringing their year-on-year growth to 2.8% for tradables and 3.2% for nontradables.

Wholesale prices (WPI) rose 3.0% in January, with prices of both locally-produced goods and imported goods increasing by the same amount. Wholesale prices have thus gone up by 13.2% in the past twelve months with locally-produced goods rising 12.7% and imported goods 14.8%.

According to the National Statistics Bureau (INE), industrial output in December increased by 7.2% over the past year reflecting the increased production of intermediate consumer goods (7.5%), regularly consumed goods (7.0%) and durable consumer goods (3.1%). Output of capital goods dropped 5.9% compared to a year ago.

INE reported industrial sales growth of 4.0% in December compared to December 2001. Capital goods sales that have been falling for months registered a substantial 21.4% increase, while durable consumer goods, intermediate and regularly consumed goods all increased by 7.3%, 3.5% and 3.9% respectively.

According to the Manufacturing Development Association (Sofofa), industrial output and sales in December were 5.6% and 4.8% respectively up on a year ago.

INE's national employment survey in the fourth quarter of 2002 registered 0.9% growth of both employment and the workforce compared to the same three months of 2001. The unemployment rate thus dropped to 7.8% and to 8.6% in the series that excludes seasonal factors, both being the lowest rates registered since early 1999. Similarly, unemployment in the Santiago Metropolitan Region dropped to 7.1%.

The University of Chile's survey of Greater Santiago revealed unemployment of 11.9% in December 2002, which is 1.2 percentage points lower than in December 2001 and 1.6 percentage points down on the previous survey in last September. This figure, like that of INE, is the lowest rate of unemployment since December 1998.

Nominal earnings in December, as measured by the hourly earnings index and the labor cost index, rose by 4.0% and 4.1% respectively over the past twelve months. Both figures are the lowest since the current index began in April 1993 and in real terms their growth was only 1.2%.

Interest rates on nominal Central Bank papers in January were generally higher than in December which is in line with inflationary expectations. 30-day PDBC were traded at 2.93% and 90-day PDBC at 2.97%. Nominal longer-term papers were also traded at slightly higher rates than in December, 2-year BCP averaging 4.15% (up nine basis points) and 5-year BCP at 5.88% (up eighteen basis points).

On the contrary, interest rates on long-term indexed promissory notes (BCU) were lower than in December, especially in the case of shorter-term papers. Thus 5-year BCU averaged 2.79% (down forty-one basis points), 10-year BCU 3.83% (down twenty-six basis points) and 20-year BCU 4.77% (down sixteen basis points).

Indexed transactions in dollars (BCD) also averaged lower rates than in December, 2.86% on 2-year BCD and 4.50% on 5-year BCD (down thirty-two and thirteen basis points respectively).

Interest rates on deposits and loans in pesos at different terms reacted differently during January with the yield on 30- to 89-day deposits falling to 2.64% and the rate on loans dropping to 5.76% in line with the monetary policy rate reduction announced on 9th January 2003. On the other hand, rates on 90-day to 365-day deposits and loans averaged 3.12% and 13.32% respectively.

Interest rates on indexed operations at all maturities dropped in expectation of a positive CPI variation. The drop was more marked in the case of 90- to 365-day transactions which registered average rates of 2.29% on deposits and 5.26% on loans with marginal values tending to fall.

Short-term monetary aggregates behaved differently in January with M1A expanding by 5.0% in the month while money in circulation contracted by 2.7%. Their annual growth rates thus reached 19% and 11% respectively. Base money registered an average contraction of 0.6% in the month.

The nominal exchange rate in January averaged 722.5 pesos to the dollar, an appreciation of 2.9% in the month. The multilateral exchange rate MER and MER-5 which is based on the US dollar, Canadian dollar, yen, pound sterling and euro, appreciated by 4.6% and 5.0% respectively. Finally, during December, the real exchange rate RER depreciated by 0.3% while the RER-5 depreciated by 0.2%, both compared to their value in November.

The trade balance at end-December closed with a US\$207 million surplus as a result of exports worth US\$1,496 million and imports US\$1,289 million.

The total value of exports was 9.8% higher than in December 2001. Copper exports registered negligible growth in annual terms whereas non-copper exports increased by 14.9% with main exports reaching growth of 19.9% and nontraditional exports 16.3%. The difference with the overall result is explained by other minor components of the trade balance (duty-free zone, non-monetary gold, etc) which dropped 2.5% compared to a year ago.

Imports at cif value were 22.4% higher than in December 2001, all categories registering increases: 18.4% (consumer goods), 19.9% (intermediate goods) and 39.4% (capital goods). The other lesser components registered an annual increase of 7.9%.

Net foreign currency holdings increased by US\$1,077.6 million in January to total US\$16,428.7 million. The increase was largely due to the sovereign bond issue which swelled Treasury operational deposits. Profits from portfolio management also helped to increase the total of reserve assets this month. The only exchange operation carried out by the Central Bank of Chile was the purchase of US\$9.7 million from the Treasury.

Chile's Foreign Debt at December 31 st 2002

Chile's foreign debt totalled US\$40,395 million at 31st December 2002 which is US\$2,363 million more than at end-December 2001. 82% of total debt corresponds to the private sector.

Medium- and long-term foreign loan disbursements in the year 2002 amounted to US\$6,857 million, 65% of which, equivalent to US\$4,456 million, went to the private sector.

Sources of medium- and long-term foreign financing this year were international financial institutions (49%), bond issues (25%) firms associated with foreign investment and suppliers (20%) and multilateral and government organizations (6%).

Amortizations of medium- and long-term foreign debt amounted to US\$5,845 million this year of which US\$1,173 million correspond to the public sector and US\$4,672 million to the private sector. 59% of total amortizations were made to international banks and financial institutions, 31% to firms associated with foreign investment and suppliers, 9% to multilateral and government organizations and the remaining 1% to bond recovery.

Foreign debt of one-year maturity according to residual term amounted to US\$8,524 million at 31st December 2002 and represented 21% of total borrowing. This amount comprises US\$6,200 million in loans with a term of more than one year that will mature during the next twelve months and US\$2,324 million in loans of an original term of up to one year.

(1) Figures corresponding to the new Imacec based on the 1996 input-output matrix. This indicator covers almost all the economic activities included in the GDP.

(2) Computed on the basis of the X -12 ARIMA model available at www.census.gov. The seasonally adjusted series excludes the seasonal and calendar effects. The cyclical tendency series corresponds to the seasonally adjusted series dismissing the irregular component. The ARIMA model selected is (1,0,1)(0,1,1).

For more detailed information on the seasonal-adjusting methodology see www.bcentral.cl/Estudios/DTBC/177/dtbc177.pdf. The original series was seasonally adjusted for the 1986-2002 period. The overlapping of the 1986-1995 period with base on 1986 was made preserving the 12-month rate on said basis. The seasonally adjusted Imacec-growth series is not strictly comparable to the quarterly seasonally adjusted GDP growth, because the results of the seasonal adjustment procedures are not equivalent when applied to different frequency series (in this case: GDP and Imacec).

(3) Corresponding to the original series minus indirect taxes.

(4) Change of the cumulative average of a period ending in the specified month as compared to the same period of the previous year.

(5) December to December change.

(6) Provisional figures.

(7) Preliminary figures.

2. Quarterly gross domestic product by type of economic activity⁽¹⁾

(Millions of 1996 pesos)

Activity	2001				
	Quarter I	Quarter II	Quarter III	Quarter IV	Year
Agriculture, livestock and forestry	608,196	549,597	177,366	189,192	1,524,351

(1) Computed on the basis of the X-12 ARIMA model available at www.census.gov. The seasonally adjusted series excludes the seasonal and calendar effects. The ARIMA model selected is (1,0,0) (0,1,1). In order to improve the seasonality component, as from March 2001 the method to correct the holidays was modified. The original series was seasonally adjusted for the 1986-2002 period. The overlapping of the 1986-1995 period with base on 1986 was made preserving the interannual quarterly rate on said basis.

(2) The quarterly seasonally adjusted GDP series growth is not strictly comparable to the quarterly seasonally-adjusted Imacec growth, because the results of the seasonal adjustment procedures are not equivalent when applied to different frequency series (in this case: GDP and Imacec).

(3) Provisional figures.

(1) Excludes copper smelting and refining.

(2) The series has been seasonally adjusted on the basis of the X-12 ARIMA model, including the effects of Easter, leap years and a vector that adjusts to the number of working days in the week. The ARIMA model used for this index is (2,1,0) (0,1,1) and the seasonally moving average of Henderson in both cases is 3x5.

(3) Change of the cumulative average of a period ending in the specified month as compared to the same period of the previous year.

(4) Provisional figures. Sofofa's figures are provisional as from 1999.

(5) December to December change.

- (1) The series has been seasonally adjusted on the basis of the X-12 ARIMA model (available at www.census.gov) including the effects of Easter, leap years, and a vector that adjusts to the number of weekdays, taking holidays into account.
The seasonal moving average of Henderson used is 3x9.
- (2) The ARIMA model used is (2,1,0)(0,1,1).
- (3) The ARIMA model used is (2,1,0)(0,1,1).
- (4) The ARIMA model used is (0,1,1)(0,1,1).
- (5) Provisional figures for the original series.

Symbols:

C: Currency in circulation.

D1A: Nonfinancial private-sector checking accounts and other demand deposits net of float, less deposits of the Treasury Banking Account, plus demand savings deposits. Float corresponds to documents received by the banks extended against all type of deposits (public, private and interfinancial).

Dp: Time deposits of private sector.

Ahp: Time savings deposits, including those for housing.

(*) Provisional information obtained through daily reports provided by the financial system.

(1) Corresponds to the mean weighted trading rate in that month, on promissory notes sold by tender.

(2) Real annual rates corresponding to the monetary policy rate (MPR) established by the Central Bank of Chile. Until 8 August 2001 the annual interest rate was applied over the UF change. As from 9 August 2001, the Central Bank of Chile decided to use a nominal monetary policy rate, setting it at 6.5% a year.

(3) Nominal rates with annual base on promissory notes sold by tender.

(4) Annual rates indexed in accordance with the UF change on promissory notes sold by tender.

(5) Annual rate on the observed exchange rate.

(1) The multilateral exchange-rate index (MER) is a measure of the nominal value of the Chilean peso with respect to a wide basket of foreign currencies. See note on methodology in the *Economic and Financial Report* of January 2000. As from January 2001 the MER includes China and Sweden. (See note on methodology, page 15 of the *Economic and Financial Report* of March 2001).

(2) The MER-5 refers to the currencies of the United States, Japan, the United Kingdom, Canada and the Euro area.

(3) Average annual change.

(4) December to December change.

- (1) The real exchange rate is the observed nominal exchange rate multiplied by the quotient between relevant external inflation and the domestic consumer price index (CPI). External inflation is calculated using the WPI, in dollars, of Chile's main trading partners, weighted according to their relative importance in terms of imports and exports - excluding oil and copper. Both the WPI and the countries' exchange rates are in terms of monthly variations. As from January 2001 the real observed exchange rate (RER) includes China and Sweden. (See note on methodology, page 15 of the *Economic and Financial Report* of March 2001). As from January 2002 fuels (oil and its by-products and natural gas) are excluded. (See note on methodology, page 15 of the *Economic and Financial Report* of August 2002).
- (2) Same definition as (1) but considers the following industrialized countries: The United States, Japan, the United Kingdom, Canada and the Euro-area countries (Germany, France, Spain, Italy, the Netherlands and Belgium). For fuller information on the new RER-5 index which refers to the five main industrialized countries trading with Chile see the *Economic and Financial Report* of January 2000.
- (3) Average annual change.
- (4) December to December change.
- (5) Provisional figures.

(1) Provisional figures, including banks and money exchange bureaus of the formal exchange market (MCF).

(2) Data at end of each month, unless otherwise stated.

(3) Represents balance at end of each month, of cash exchange position of banks and money exchange bureaus of the MCF.

(4) Represents purchases less forward sales at the specified date, including operations in pesos and indexed units (UF).
 Plus sign : Purchase net balance.
 Minus sign : Sales net balance.

(5) Spot balance plus forward balance.

(6) As from 30 May 2002, includes operations carried out pursuant to Chapter IV D.1 of the Compendium of Financial Regulations (CNF) of the Central Bank of Chile and foreign currencies' exchange operations (other than dollar) with Chilean pesos and UFs.

38. Amount of forward operations in currencies within the MCF (formal exchange market) (*)
 (US\$ million)

(1) Provisional figures.

(2) Trade Balance figures represent actual imports and exports, based on statistics of the National Customs Service to which the pertinent coverage and valuation adjustments have been made in order to arrive at the figures used in the Balance of Payments.

(3) Balance of Payments: Corresponds to changes in international reserves resulting from balance of payments transactions excluding changes in reserves such as those produced by revaluations, gold monetization and allocation of SDRs. For further explanation refer to the *Boletín Mensual* of the Central Bank of Chile (April, 1981). As from 1993, figures have been calculated to incorporate price restatement of assets.

(*) Provisional figures. Classification of imports has been modified to bring it into line with that of National Accounts. The modification affects figures as from 1990. In consideration of the nature of the goods and also the specific uses to which they may be put, certain consumer- and capital-goods imports had to be reassigned to the intermediate-goods category. In some cases the category has been determined by the end use.

53. Seasonally adjusted total imports and non-oil imports⁽¹⁾
 (US\$ million cif)

Date		Total imports				Non-oil imports

(1) Provisional figures. The export-price index corresponds to the Paasche index, while the volume index corresponds to the Laspeyres quantum index. Both are calculated with base 1996 = 100, so the changes registered do not coincide with the figures given in table 57. These calculations exclude exports of rapairs on goods.

(2) General tariff regime exports only.

(3) Gold excluded.

56. Quarterly index of goods-export volumes, prices and values (1)

(1) Provisional figures. The export-price index corresponds to the Paasche index, while the volume index corresponds to the Laspeyres quantum index.
 Both are calculated with base 1996 = 100, so the changes registered do not coincide with the figures given in table 58. These calculations exclude exports of rapairs on goods.

(2) General tariff regime exports only.

(3) Gold excluded.

57. Annual change in volume, price and value of goods export⁽¹⁾

(Percentage change on the same period of the previous year)

(1) Prices supplied by the London Metal Exchange (LME) and informed by the Chilean Copper Commission (Cochilco).

(2) Average fob export price computed from shipment value divided by volume. Shipment values, provisionally reported by Customs' statements, are afterwards adjusted. In the previous series these corrections were imputed to the values of the month in which they were provided. The new series, instead, imputes them to the month of the statement being adjusted. For this reason the information of recent months may change again.

(3) Average cif import price from Customs' statements computed from shipment value divided by volume.

(4) Cumulative weighted average change of that month with respect to the annual average of the previous year (copper average is not weighted).

(5) These annual averages are not coincident with monthly figures, because monthly prices have been weighted by each month volume. However the annual average for copper is based on daily data.

(6) December to December change.

(-) Not available.

62. International reserves of the Central Bank of Chile (1)

(US\$ million)

- a/ Data on Internet (www.bcentral.cl ; www.bolsantiago.cl ; or www.ine.cl).
- b/ The 12-month change of the economic activity index and the totals on imports, exports and trade balance are published on Internet (www.bcentral.cl under "new in this site"), between the 17th and the 23rd of each month, or the following working days if they were holidays. From the later date onward, these data, including additional and complementary information, are included in the "Informe Económico y Financiero", and in the permanent website. "Informe Económico y Financiero" is a fortnightly publication of the Banco Central, summarized in this monthly "Economic and Financial Report".
- c/ Deadline. Unless unforeseen circumstances, the exact dates of data releases are informed on Internet no later than the week prior to the data release (www.bcentral.cl, under "economic data"/"release of economic statistics")
- d/ Releasing is made before the beginning of transactions of the next working day.
- e/ Releasing is made the next day after the close of transactions.
- f/ On the first date, information covers the first half of the month in question, on the second and third dates, information of the whole month is given.
