The seasonally-adjusted series dropped 0.8% with respect to the previous month, and dropped 2.1% in twelve months. The month came with the same number of working days as November 2021.

The Imacec result was explained by drops in trade and manufacturing activity (figure 2). The seasonally-adjusted drop was determined by the performance of the mining industry (figure 3).

The non-mining Imacec posted a twelve-month drop of 2.2%, and a deseasonalized drop of 0.2% with respect to the previous month.
