February 2020's monthly index of economic activity, Imacec

According to preliminary information, last February the Imacec rose 2.7% over the same month a year before. The seasonally-adjusted series rose 0.6% with respect to the previous month, and 2.5% in twelve months. The month came with one more day than February 2019 because of the leap year.

The mining Imacec increased 10.4% while the non-mining index increased 2.0%, explained by the performance of manufacturing industry and construction. In seasonally-adjusted terms, and with respect to the previous month, the mining and non-mining Imacec rose 2.2% and 0.4%, respectively.
